Director's preface

The report covers activities of the Danish Research Unit on Industrial Dynamics (DRUID) for the period January - December 2007. The main emphasis of the report is on presenting outcomes in terms of publications, PhD activities or communication and interaction with users, but a few additional points regarding the run of the year are worth mentioning.

The year started off with one of the biannual PhD courses in "Getting your research into the journals" organized by DRUID back-to-back with the winter conference. The 2007 DIME-DRUID Academy Winter Conference was the 8th in line exclusively for Ph.D. student from all over the World. Eighty-two applications with abstracts were received from European or overseas doctoral students from Brazil, United States, Canada, India, Thailand, Australia and South Korea. Given the considerable rise in quality over the past couple of years it came as no surprise that some signs of slight decline were noticed. However, the fifty-four students who were selected and presented their papers did an excellent job. Two participants were given the opportunity to represent DRUID and present their work at the doctoral Colloquia for Competition and Cooperation in the US, April 2007. Previous Colloquia have taken place at Carnegie Mellon, Wharton, MIT, Michigan, Harvard, NYU, Northwestern, Duke, Boston University, the University of Toronto, Emory University, University of California (Berkeley), and at the Ecole Polytechnique Fédérale de Lausanne (EPFL), Switzerland. Many of the previous years' student presenters now are faculty members at leading schools of management around the world and DRUID is pleased to have been invited into this prestigious group.

The DRUID Summer Conference 2007 attracted significant amounts of merited scholars from an increasingly number of universities around the globe and further details are provided in this report. To handle the growth of submissions without compromising the quality of the selection process of papers to be presented at the conference considerable effort has been put into enlarging the corps of qualified external reviewers who assisted DRUIDs in the double blind review process. DRUID's International Scientific Advisory Board has also provided valuable assistance in selecting candidates for the DRUID Best Papers Award and Best Young Scholar Paper Award.

The policy of gradually reducing the requirement for sponsorships by more efficient managerial procedures and other cutting cost measures has continued through 2007. In particular, the investment made in developing an integrated conference website has significantly reduced the secretarial support needed for launching our conferences. I aim to reach break even during the next couple of years so that conference fees and additional income sources match the cost of planning and running conferences.

DRUID has during 2007 benefited in many different ways from being an active part of the network DIME - Dynamics of Institutions and Markets in Europe. DIME is working on the economic and social consequences of increasing globalization and the rise of the knowledge economy and consists of more than 200 scholars working at more than fifty universities and business schools throughout the European Union. DIME is sponsored by the 6th Framework Programme of the European Union and was a co-organizer of the DRUID winter Conference in 2007.

During the year of 2007 the interaction with the Danish Ministry of Science, Technology and Innovation was further strengthened as members of DRUID provided advice for policy makers and engaged in intense dialog on innovation policy issues with the Department as well as with the Ministry's Agency for Science, Technology and Innovation, in particular its research foundation RTI. These mutual beneficial relations are planned to be continued and deepened in the years to come.

Looking ahead I am pleased to report how Copenhagen Business School as well as Aalborg University decided to extend their economic support to DRUID for the coming three-year period 2008-2010, thus providing much needed financial stability. Another great event was the successful completion of the negotiations with The University of Southern Denmark. Their Strategic Organization Design Unit will join DRUID as by January 2008. I look much forward to working with the new members. I am convinced that they will significantly help strengthen DRUID's research and increase its scope in several ways.

Further details of previous and subsequent activities within DRUID are available through our website: www.druid.dk.

Introduction: Coverage of the report – defining DRUID participant

The core of the report presents an overview of activities and outputs covering *DRUID participants*. They are divided into two groups: DRUID staff and DRUID PhD students. In order to define who belongs to each of these groups we have used the following criteria:

Those who are included as 'staff' fulfil all the four criteria:

1. They have confirmed that they still regard themselves as 'druid participants'
2. They have agreed to submit at least one working paper to the DRUID Working Paper Series this year and at least one within the next two years.
3. They have participated in the DRUID conferences or have helped organizing these.
4. They have agreed to contribute to the realisation of the DRUID research programme.

Those who are included as PhD students fulfil all the following five criteria:

1. They have/have had a tutor among those registered as DRUID staff.
2. They have confirmed that they still regard themselves as 'druid participants'
3. They have confirmed that their PhD thesis can be found on the DRUID homepage either by a direct link or by a pdf-file.
4. They have participated in the DRUID winter conferences.
5. They have worked on issues that fall within the DRUID research programme

Some participants in DRUID have moved from the category 'PhD students' to becoming 'staff'. They will appear in the staff category but they will also appear in the schematic presentation of PhD students in the section on PhD Activities.

Visiting scholars belonging to the DRUID network and publishing some of their work in the DRUID Working Paper series have *not* been included among the DRUID participants. Their contributions to the programme will be reflected exclusively through the list of working papers in appendix 1. With these definitions, there are 27 persons registered as staff, whose activities are reflected in the report, and 17 PhD students have in 2007 been connected to the research programme. Over the whole period 1995-2007 no less than 51 PhD students have been active in DRUID; of these 38 have successfully defended their theses so far. (See Appendix 2)

SECTION I: Publications

Introduction

In what follows the written output from DRUID is presented under the following headings:

- a. Articles in refereed journals
- b. Articles in refereed books
- c. Refereed books
- d. Papers, working papers and research reports

An attempt has been made to make sure that the same article or book only appears once as a refereed contribution. This also means that all contributions with several authors have been listed under one author only.

In table 1, the number of refereed contributions has been given for years 1997-2007.

SECTION II: PhD Activities

DRUID was initially established without funds for PhDs. However, during the run of the DRUID program an increasing number of PhD students have participated in the activities and greatly benefited from close interaction with senior scholars from the international network. The DRUID network, which was accepted by the Social Science Research Council (SSF) in December 2000, had PhD training as an explicit task of high priority. The PhD activities were anchored in a permanent institution called the DRUID ACADEMY, rather than in a temporary network. The DRUID ACADEMY is a long-term co-operation agreement between the two major departments of DRUID – Department of Business Studies at Aalborg University and Department of Industrial Economics and Strategy at CBS in co-operation also with Southern Danish University and Aarhus School of Business.

The intention of the DRUID ACADEMY is to create synergy and critical mass for PhD students participating in the activities of DRUID.

A domestic course program has now run for several years with increasing number of foreign students.

The annual DRUID Winter conferences have focused at international PhD participation especially from January 2000 and now attract more than 100 submissions mainly from Europe but also from the Americas, the Far East, and the Antipodes.

The DRUID ACADEMY is plugged into an international network, the European Doctoral School on Economic, Technological and Institutional Change EDS-ETIC, which can be dated back to 1993. Through two substantial 3 years EU grants (1996-98 and 1999-2001) from the EU Framework program Training and Mobility of Researchers (Action 4), DRUID has through the Aalborg section been part of the core group organizing PhD courses/seminars at the European level in Maastricht and Strasbourg. These activities (the ETIC PhD courses) have been scheduled as four weeks annually. Two of these weeks have been co-coordinated by DRUID members since their beginning (Esben Sloth Andersen and Bent Dalum, Aalborg University). In 2001 these institutions extended their network and ambition towards creating EDS-ETIC as a European doctoral school and the DRUID Academy is representing the Danish participation. EDS-ETIC was recognized as a Marie Curie Training site for doctoral students. EDS-ETIC is closely connected to the Summer School program in industrial economics, ESSID, organized as one week annually at Corsica.

DRUID invited to send selected PhD students to participate in the annual activities of the CCC consortium of major US PhD programs in the field of the economics of technical change, headed by Prof. R. Nelson, Columbia, and D. Moverly at Stanford. Intensified co-operation between the European and US networks, involving the DRUID ACADEMY as a central node, has materialized over the years.

In 2007, 6 PhD students who participated in the DRUID network have finalized their PhD studies by successfully defending their theses. At present there are close to 20 local and non-local PhD students connected to the network.

An important element in the DRUID PhD training is the active participation of students in the annual DRUID Winter Conference where PhD students are expected to present work in progress and in the annual DRUID Summer Conference where they are also expected to present papers and

act as discussants on papers by international scholars. The PhD students related to DRUID have been active in all these respects.

DRUID Working Paper Series 2007

DRUID Working Papers presents the most recent results from on-going research and policy analysis by scholars working in the context of the DRUID research programme. Each year 25-30 papers focusing on knowledge, innovation and entrepreneurship are published. Different levels of analysis (micro, meso and macro) and interrelations between these, as well as systemic approaches characterise the series.

The papers are sent to wp@druid.dk as doc file or pdf file and after a check at the WP editor Gert Villumsen the paper will be edited to fit the DRUID WP standards and published on the website within three or four weeks.

Working Papers by DRUID members are also included in the Section 1: Publications.
